Notes
<b>JavaScript</b> is required for the application to function optimally. If not enabled, certain features and functions will not work properly.
<b>Screen resolution:</b> 800 x 600 VGA or 1024 x 768 VGA
<b>Windows Display Properties Settings</b> should be 96 dpi (Windows default).
<b>Browser Text Size</b> should be Medium.

### Category Definitions

The Online Banking System (Checkfree RXP) is tested at varying levels using many different browser/OS combinations. The level of testing determines the support category to which the browser/OS combination is assigned. There are 5 browser/OS categories. The categories are defined as follows.

- **Certified**– All pages of the product have been tested and browser meets all functional and visual design requirements completely.
- **Supported** – Most pages of the product have been tested and browser meets most functional and visual design requirements, however some visual defects may occur.
- **Allowed** – The main pages of the product have been tested for basic functionality, however, visual defects may occur.
- **Blocked** –This browser has known issues with CSP product(s) and possibly with other web sites as well. A notification splash page will be displayed advising the user that browsers in this category cannot be used with the application and provides the user with a list of appropriate browsers. Access to the application will be denied.
- **Unsupported** – Browser/OS combinations not specified in one of the other categories default to Unsupported. The product has not been tested with unsupported browser/OS combinations. Browser/OS combinations in this category are not widely used as determined by usage statistics for the browsers.
