# We're branching out

## Come grow with us

If there's one thing we've learnt in our years as a leading provider of mission-critical payments and banking software solutions, it's that explosive growth calls for extraordinary teamwork. Continuous expansion means we are always on the lookout for exceptional people to join our team—and nowhere is this more so than in our Cape Town and Johannesburg offices!

Newly graduated? An old hand? We have room for both—provided you are ready to meet the challenges of our dynamic environment.

### Our growth, your opportunity

S1 Corporation provides payments, banking and lending solutions to organizations all over the world. We serve over 3000 institutional customers in 50 countries, and we continue to expand.

S1 employs more than 1600 people in operations on every inhabited continent. Our Cape Town office is one of the larger sites and, together with our Johannesburg office, it represents a unique opportunity for South African software developers, project managers, architects, QA specialists, support engineers and technical support staff to work for a NASDAQ-listed company with international presence.

In Cape Town, we are often in search of high-quality technical documentation and training experts. We also employ creative staff who work on our multifaceted marketing campaigns, user interfaces, international industry events and other projects—whatever a company of our size needs to deliver its message in the most professional and attractive way possible.

### Equipping you to excel

We believe in investing in the people we take onboard. How else are we going to unlock the potential we see in you? Our comprehensive orientation programme boasts world-class instructors and excellent materials. Time in the classroom varies according to your role but typically runs to about four weeks. And once you're up and running, an integrated mentorship programme keeps you on the right track.

We offer regular internal supplementary courses, and you will be able to locate and motivate for additional external training, using funds in your annual personal development budget. All of this is aimed at helping you keep your skills razor-sharp, or even branch out into new areas of expertise.

### An environment conducive to development

Our environment is designed to make your working life comfortable and productive. We start with the basics: bright, welcoming office spaces that offer all the amenities, from spacious, well-appointed meeting rooms to espresso machines and gaming facilities.

But the intangibles are just as important. Our corporate culture is characterized by openness, honesty and respect. No door is closed to you at S1. We ensure that you and your manager have the time to talk about what's on your mind. Healthy curiosity is also something we try to foster. Cape Town's weekly workshops, delivered by any volunteer with something to share, no matter how arcane, are a testament to our employees' passion for knowledge.

Another plus? International travel, on a fairly regular basis, is also a possibility for many. With operations around the globe, it's easier for us to see the world while we help our customers meet their goals.

## What it takes

Our customers demand a lot from us, so we have high expectations of ourselves and those we hire. Above all other things, we want people who demonstrate absolute integrity, which is a strong company focus. True passion in helping customers meet their challenges and a commitment to personal excellence in all spheres of work: these qualities we rate extremely highly too.
